# Beyond Bibliometrics: The use of traditional and new methods to analyze academic research performance, institutional position, and socioeconomic impact
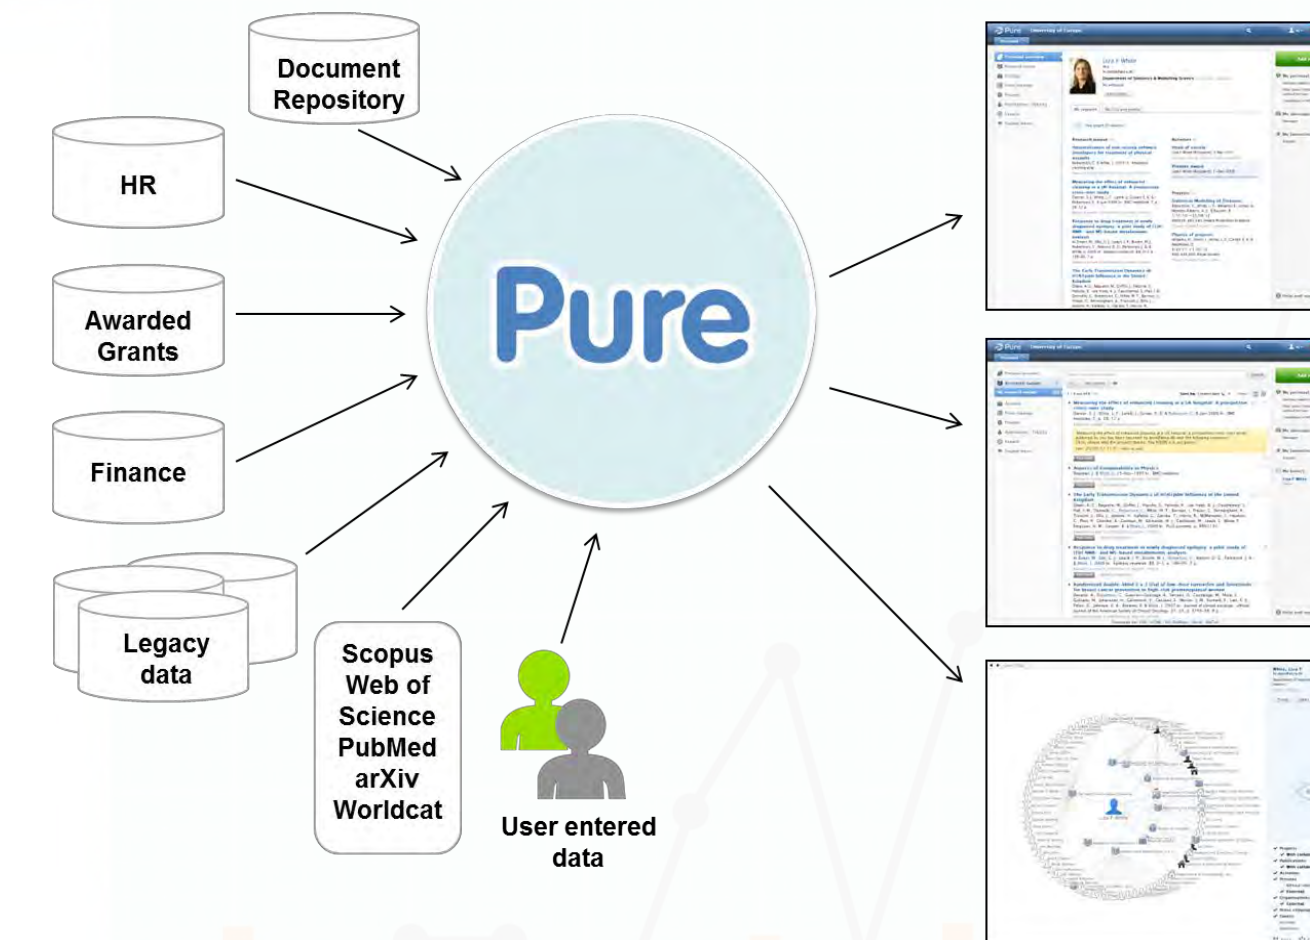

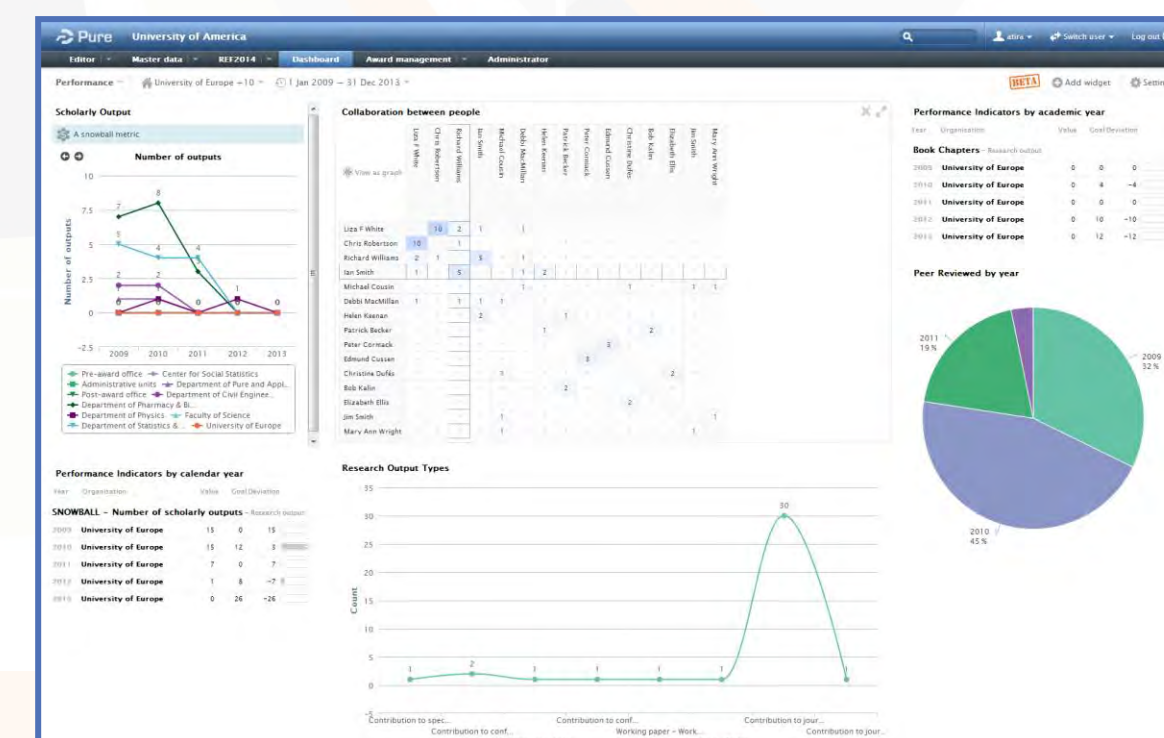

Vadim Sobolev

Customer Consultant, Elsevier Research Intelligence
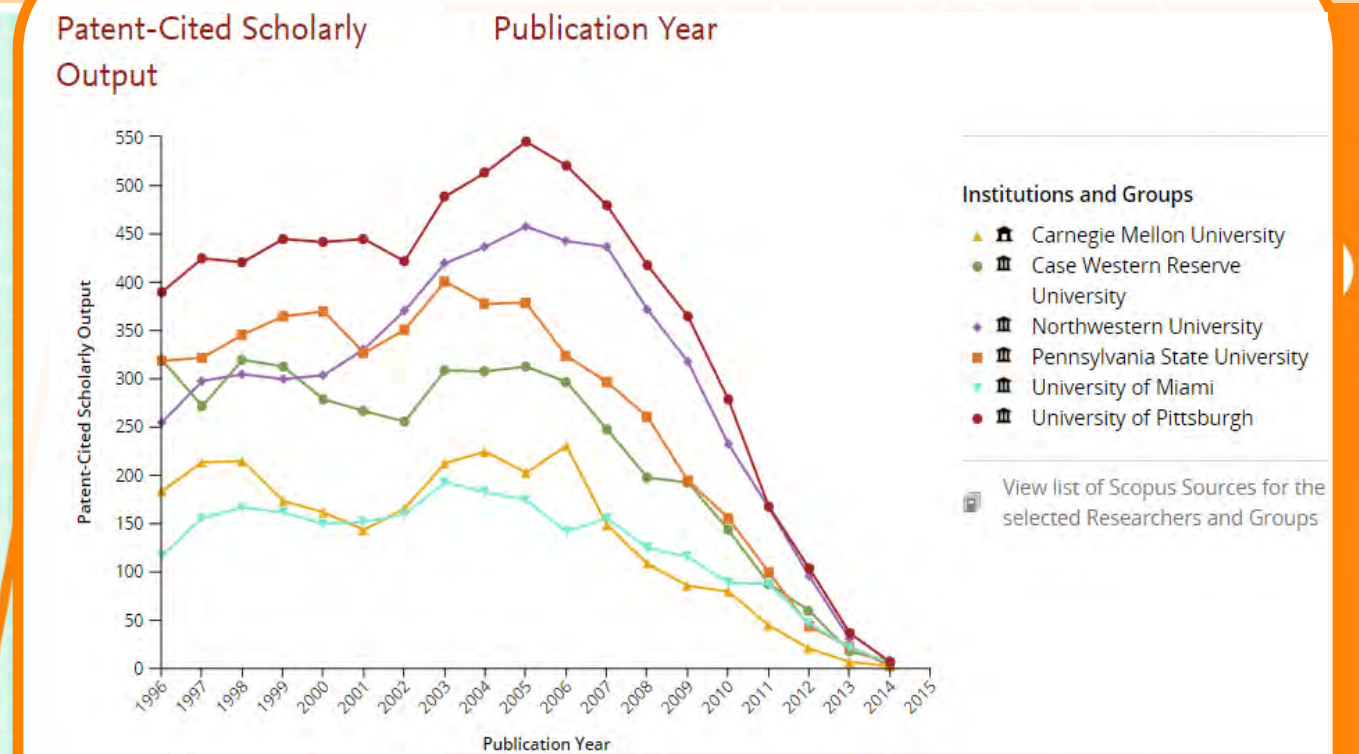

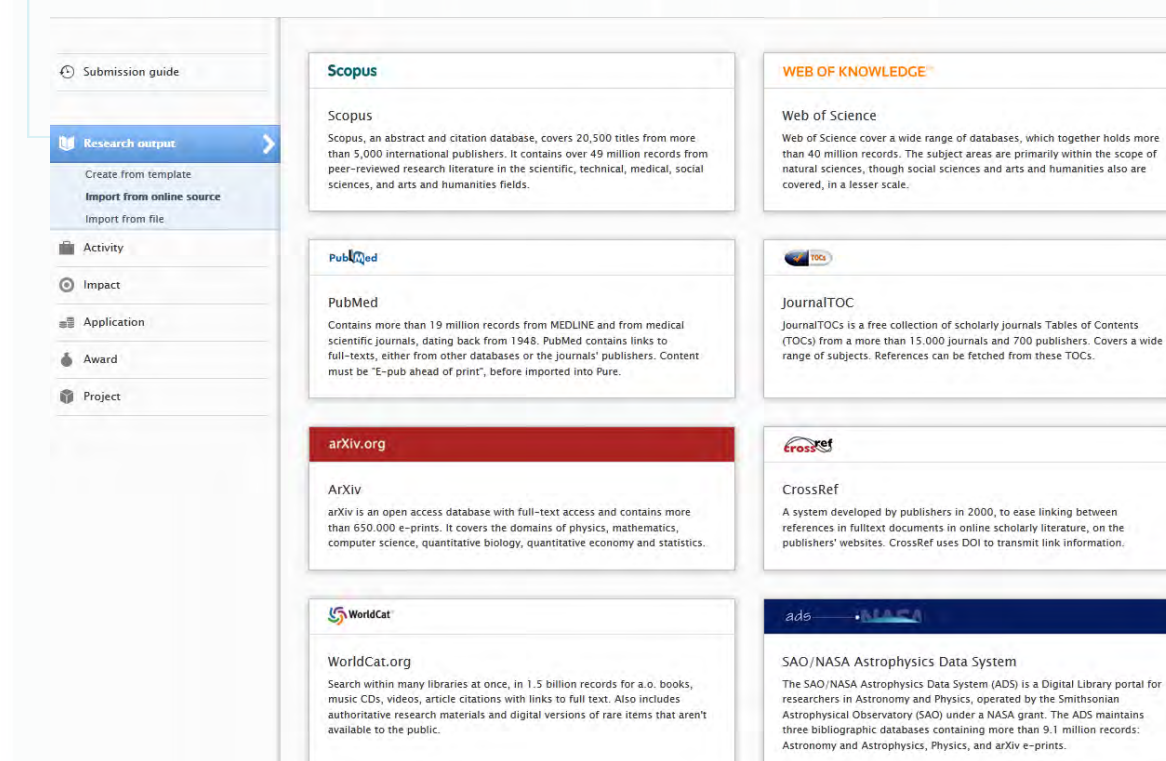

ELSEVIER

Pure is a faculty and research information management system that has been widely adopted in Europe and USA, not only by universities, but by institutions as varied as museums and hospitals. It relies on a robust data model that allows flexible reporting and detailed tracking of all key elements of research, service, and teaching over time, including tracking the full research lifecycle from grant submission to closeout. Pure integrates Elsevier semantic technologies with the robustness of and flexibility of the CERIF data model.

Pure aggregates your organization's research information from numerous internal and external sources, and ensures the data that drives your strategic decisions is trusted, comprehensive and accessible in real time. **Pure** enables universities to create detailed individual "fingerprints" of their faculty's research activities to create an intellectual inventory of institutional research expertise and showcase your expertise online. A highly versatile centralized system, **Pure** enables your organization to build reports, carry out performance assessments, manage researcher profiles, enable research networking and expertise discovery and more, all while reducing administrative burden for researchers, faculty and staff.

Pure easily integrates multiple internal, public and commercial data sources including Scopus, Web of Science, Pubmed, ArXiv, and many others. Pure can be run from the cloud or dynamically integrated with internal HR and Finance systems, allowing for real-time updates and reporting. Pure also allows for unlimited document uploads, and has the ability to make all open access publications immediately available within system. It can also function as a robust institutional repository or link to an existing one.

SciVal offers quick, easy access to the research performance of 7,500 research institutions and 220 nations worldwide.
A ready-to-use solution with unparalleled power and flexibility, **SciVal** enables you to visualize research performance, benchmark relative to peers, develop collaborative partnerships and analyze research trends. Access comprehensive research performance summaries of any desired research entities, identify their unique research strengths and multidisciplinary Research Areas. Compare the performance of any institutions, countries, and pre-defined groups, or create your own research area and monitor trends over time.
